**PART II**

**SURVEYS AND PLANS**

**9. Where a surveyor makes a survey and plan of land to which the Act applies, he shall make the survey and plan in accordance with this Regulation and *The Surveys Act* and the regulations made thereunder.**

**10. Before undertaking a survey, the surveyor shall refer to all documentary evidence related to the land under survey and the land adjoining the land under survey.**

11.—(1) Where a monument no longer exists, all evidence concerning its original position shall be considered in the re-establishment thereof.

(2) Where a monument is placed on an existing boundary, the monument shall be placed on the boundary at a point which shall be established from evidence of the boundary line on both sides of the monument so placed.

12. The requirements of all statutes and regulations that affect the boundaries of the land shown on a plan shall be ascertained and complied with before the plan is presented for registration.

#### STANDARDS OF SURVEY

13.—(1) All boundaries of the land being surveyed shall be measured directly or shall be determined by closed traverse or triangulation.

(2) Hanging lines shall be verified by two independent measurements of angle and distance.

14.—(1) The error of closure in respect of the perimeter of each subdivision unit shall not exceed,

- (a) for the first 100 feet of perimeter, an error of 0.10 feet;
- (b) for the next 1000 feet of perimeter, an error of 0.02 feet per 100;
- (c) for each succeeding 100 feet of perimeter up to a total perimeter of 1900 feet, an error of 0.01 feet; and
- (d) for a total perimeter of more than 1900 feet an error of 1 in 5000.

(2) Subsection 1 applies to hanging lines.

15. The position of a natural boundary that forms a boundary of the land being surveyed or that governs the position of that boundary shall be determined by,

- (a) periodic offsets at such intervals as the complexity of the natural boundary demands and to such extent as will enable relocation of the natural boundary, said offset measurements to be of not greater length than 250 feet and at not greater intervals than 200 feet along a controlled traverse;
- (b) stadia measurements of no more than 1000 feet in length from stations on a controlled traverse, to such points on the natural boundary as are necessary to determine all its irregularities and to enable its relocation, such points to be of not greater intervals than 200 feet along the natural boundary; or
- (c) controlled photogrammetric methods.

16. Bearings shall be astronomic.

#### PLANS

17.—(1) An original plan,

- (a) shall be drawn on the dull side of durable linen that is not waterproof, or on other translucent material approved by the Inspector, and that is of such quality that opaque or translucent reproductions may be made by either a wet or dry process without damaging the plan;
- (b) shall be drawn and executed in black india ink only and shall show no colouring of any kind whatsoever;

(c) shall be drawn to a professional standard of draughtsmanship and be neat and clear and in fit condition for making legible reproductions.

(2) The only handwriting to appear on the plan shall be the signatures of those persons required to sign the plan, and under each signature shall be legibly printed the name of the person signing.

(3) Where a plan is a plan of public lands under the jurisdiction of the Minister of Lands and Forests or of the Minister of Mines, a reproducible linen duplicate of the plan may be registered in lieu thereof.

18.—(1) No part of a plan or of any certificate, approval or other matter required thereon shall be stamped, typewritten, lithographed or engraved, but the title, legend, form of the surveyor's certificate or margin may be printed, if it is machine printed with metallic overprint ink.

(2) Subsection 1 does not apply to the surveyor's seal or to the consent of the Minister of Municipal Affairs under *The Planning Act*.

19. A plan shall be drawn to a scale or scales sufficient for clarity of all particulars of the plan.

20. All linear measurements on a plan shall be shown either in feet and decimals of a foot or in feet and inches.

21. Directions shall be shown on the plan in quadrantal bearings referred to the cardinal points.

22.—(1) The origin of the bearings shall be stated on the plan in note form.

(2) Bearings may be derived from a line of known astronomic bearing if survey evidence of such line exists on the ground in its original position and is shown on the plan.

(3) Where bearings have been determined by the surveyor by astronomic observations, a note shall be shown on the plan as follows:

Bearings are astronomic, derived from observations on (polaris).....(sun) and referred to the meridian.....

23. There shall be shown on a plan clearly and accurately,

- (a) by light lines of consistent weight which may be broken, sufficient information to enable the identification of the limits of pre-existing subdivision limits or limits defined by,
  - (i) registered instruments affecting land included within the land surveyed, and
  - (ii) instruments registered under the Act or under *The Land Titles Act* and affecting land adjoining the land being surveyed; and
- (b) the identifying numbers, letters or words of the land in clause a.

24.—(1) Subject to subsection 2, the limits of subdivision units created by a plan and the identifying numbers, letters or words shall be shown on the plan by solid lines of a consistent weight and heavier than the lines referred to in section 23.

(2) The outer limits of the area of land dealt with on a plan shall be shown by lines heavier than the lines of survey or delineation either within or outside the area.

25.—(1) A plan shall show the position and form of all survey monuments and other evidence found, conflicting or otherwise.

(2) Every monument and all other evidence found shall be distinguished by the abbreviation "Fd" together with any surveyor's registration number found on the monument.

**26.**—(1) The measurements of distances and directions obtained by the surveyor in the course of a survey on the ground shall be reduced to true measurements and shall be shown on the plan.

(2) Where a measurement of distance or direction differs from that shown,

(a) on a registered plan; or

(b) in a registered deed or other registered conveyance,

the measurement shall be followed by the abbreviation "Meas." and the corresponding measurement on the registered plan, or in the registered conveyance shall be noted followed by "Plan (No.) . . . . ." or "Deed (No.) . . . . ." or as the case may be.

**27.** Sufficient data shall be shown on the plan to permit the calculation of a closure of each subdivision unit created by the plan.

**28.**—(1) A plan shall be certified by a surveyor in Form 1.

(2) Every plan shall contain a true copy of the field notes of the survey.

**29.**—(1) A plan shall show,

(a) the bearing and length of each straight line forming any surveyed limit or part of any surveyed limit, except that, in the case of a tier of lots that is shown by dimensions to be a series of parallelograms, the direction of each of the side lines of the lots may be indicated by the bearings at both ends of the tier;

(b) the radius, arc length, chord length and chord bearing of each curved line forming any surveyed limit or part of any surveyed limit;

(c) the perpendicular or radial widths of all streets, lanes and public passages of which the limits are parallel or concentric;

(d) the straight line distances and bearings between the points of street intersections on the same side of the street and, where all or part of an intersection is on a curve, the radius, arc length, chord length and chord bearing of the curved portion; and

(e) the location of the radial centre of an arc that forms the end of a cul-de-sac, clearly defined with reference to the street or streets approaching the cul-de-sac.

(2) Where the arc of a simple curve joins a line that is not tangent to the curve, the junction of curve shall be shown as "not tangential".

(3) Where space does not permit the showing of the chord length and chord bearing in their normal position in respect of a curve, they may be shown in schedule form in some convenient place on the plan.

**30.**—(1) There shall be shown on a plan all highways, roads, streets, lanes, railway lands, rivers, canals, streams, lakes, ponds and marshes lying within or abutting upon the surveyed land.

(2) Natural boundaries shall be accurately plotted on a plan.

(3) Where a plan shows traverse lines from which natural boundaries were surveyed, complete particulars shall be shown on the plan, including,

(a) bearings, distances and lengths of offsets and the angles that they make with the respective traverse lines;

(b) bearings and distances of stadia measurements;

(c) information relevant to any other method by which a natural boundary is determined; and

(d) information relating to the boundaries and ties with other surveys and land boundaries.

(4) The particulars required by subsection 3 shall be shown along the appropriate course on the plan or in a schedule if they are identified and related to the appropriate course on the plan.

**31.**—(1) Every subdivision unit into which an area of land is subdivided shall be designated on the plan by a number or letter or by words.

(2) Designation by numbers or letters shall be in consecutive order.

(3) Not more than one subdivision unit shall be designated on the plan by the same number, letter or words.

(4) A subdivision unit on a plan shall not be designated as a "parcel".

**32.** Subject to section 33, a plan other than an expropriation plan shall not contain information describing the purpose for which any portion of the land on the plan is intended to be used.

**33.** Highways, roads, streets, lanes, commons and reserves shall be so designated on the plan.

**34.** An easement or other right of way existing at the time of the survey shall be shown on the plan.

**35.** Every plan other than an expropriation plan shall,

(a) bear a title showing the designation of every subdivision unit the whole or a portion of which is included within the area of survey shown on the plan; and

(b) shall show under the title the scale to which the plan is drawn and the year in which the survey was completed.

**36.** A simple north point accurately plotted shall be placed in a conspicuous position on each plan.

#### RULES RE SUBMISSION OF PRIVATE BILLS

63.—(1) No petition for any Private Bill is received by the House after the first two weeks of each Session nor may any Private Bill be presented to the House after the first three weeks of each Session; nor may any report of any Standing or Select Committee upon a Private Bill be received after the first six weeks of

each Session; and no motion for the general suspension or modification of this Rule shall be entertained by the House unless after reference made thereof, at a previous sitting of the House, to the several Standing Committees charged with the consideration of Private Bills upon Report submitted to two or more of such committees.

64.—(1) Any person desiring to obtain a Private Bill shall deposit with the Clerk of the House at least eight (8) days before the meeting of the House a copy of such Bill together with a fee of \$150, and if such Bill is not deposited by that time the applicant shall pay \$10 for each and every day which intervenes between the said eighth day and the date of the filing of the Bill.
